

SC13 Short lecture @ AICS

November 2013

Name	Dr. Atsuya UNO (AICS System Operations and Development Team)
Title of your Presentation	Operation status of the K computer
Abstract	<p>The K computer is a distributed-memory parallel supercomputer system with 82,944 compute nodes. Its peak performance is 10.62 PFLOPS. We have operated the K computer for one year.</p> <p>In this presentation, I will explain the outline of system configuration and facilities of the K computer, and talk about the latest operation status.</p>
