|----------------------------|--|
| Name                       | Mr. Shinichi MINEO (RIST)  |
| Title of your Presentation | High Performance Computing Infrastructure (HPCI) System in Japan and call for proposals of the projects using the HPCI   |
| Abstract                   | <p>The High Performance Computing Infrastructure (HPCI) is a computational platform realized by connecting the K computer and other major Japanese super computers via high speed networks.</p> <p>The RIST Kobe Center is responsible for calling for proposals of the projects using the K computer and other HPCI computers. After fair screening processes, the computational resources will be awarded for researchers in academia and also in industry. With regard to the use of the K computer, anybody from around the world is eligible to apply for by following the instructions found on the HPCI Portal Site:</p> <p><a href="https://www.hpci-office.jp/folders/english">https://www.hpci-office.jp/folders/english</a>.</p> <p>In this short lecture, brief overview of the HPCI system, and guidance on how overseas applicants can prepare their proposals and submit will be given.</p> |
